IMPLEMENTATION OPTIONS FOR DATACAP PARTNERS

1 INTRODUCTION

2 INTERFACE AGNOSTIC

3 AGNOSTIC PAYMENTS

4 PAYMENT DEVICES

5 SECURE SEMI-INTEGRATED PAYMENTS

6 OMNICHANNEL PAYMENTS

INTRODUCTION

Unattended payments are nothing new, but the markets where they're now being employed are rapidly shifting and expanding. No matter which verticals you serve, Datacap has plenty of options to help you seamlessly integrate unattended payments into your product offering.

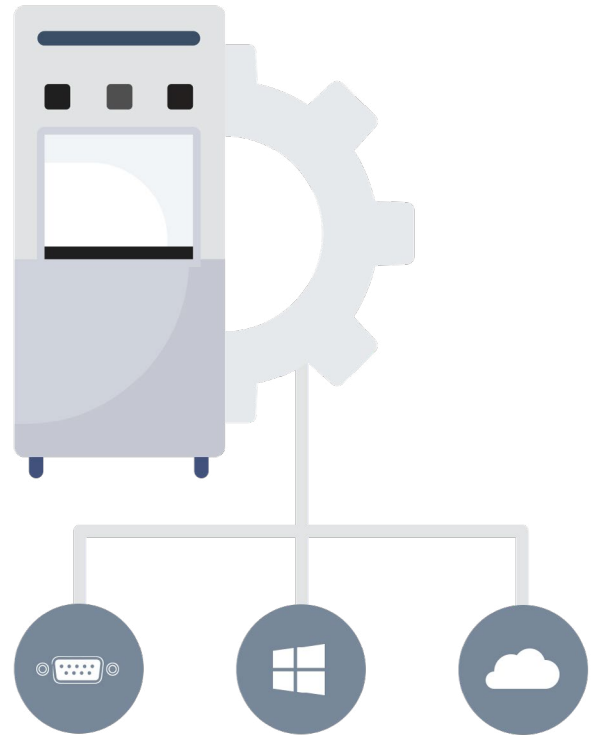

Datacap Partner: Jabbrrbox

INTERFACE AGNOSTIC

Datacap's flexible integration options provide a turnkey payments solution that fits your Point of Sale regardless of operating system. EMV-certified integration paths for Windows-based applications, direct serial connections, or HTTPS Post implementations are available today.

AGNOSTIC PAYMENTS

One integration to Datacap's payments solution provides you with instant access to virtually every processor. No individual development, certifications or per-transaction fees.

Merchant Services

PAYMENT DEVICES

One integration to Datacap's payments solution provides you with instant access to an ever-evolving list of plug and play EMV-certified devices. Whether you're looking for unattended options exclusively (see below), or plan to mix and match with our [attended hardware](#) offerings, Datacap has you covered.

Ingenico iUC 285

Ingenico iSelf Series / DUO

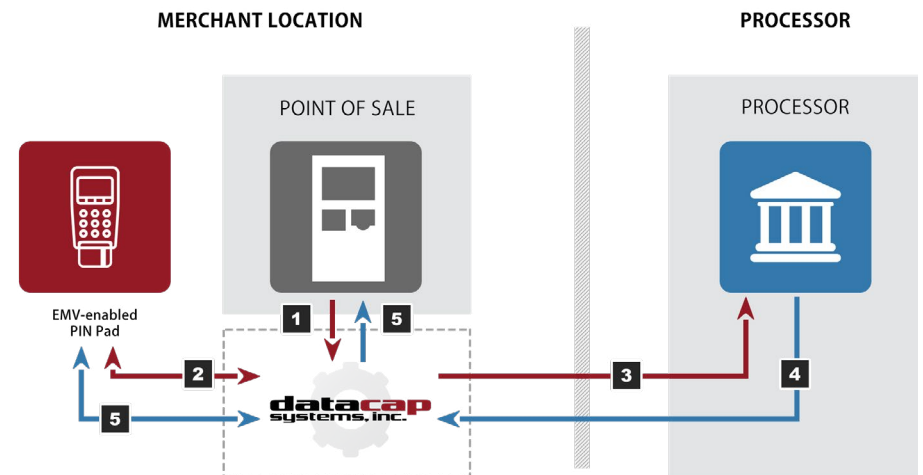

Ingenico iSelf Series / TRIO

SECURE SEMI-INTEGRATED PAYMENTS

Our secure semi-integrated approach to payments maintains complete separation of all cardholder data from your Point of Sale application – removing your app from the scope of the Payments Application Data Security Standard (PA-DSS). We drive the EMV devices directly and handle all payments-related certifications on your behalf, so you can focus on improving your Point of Sale.

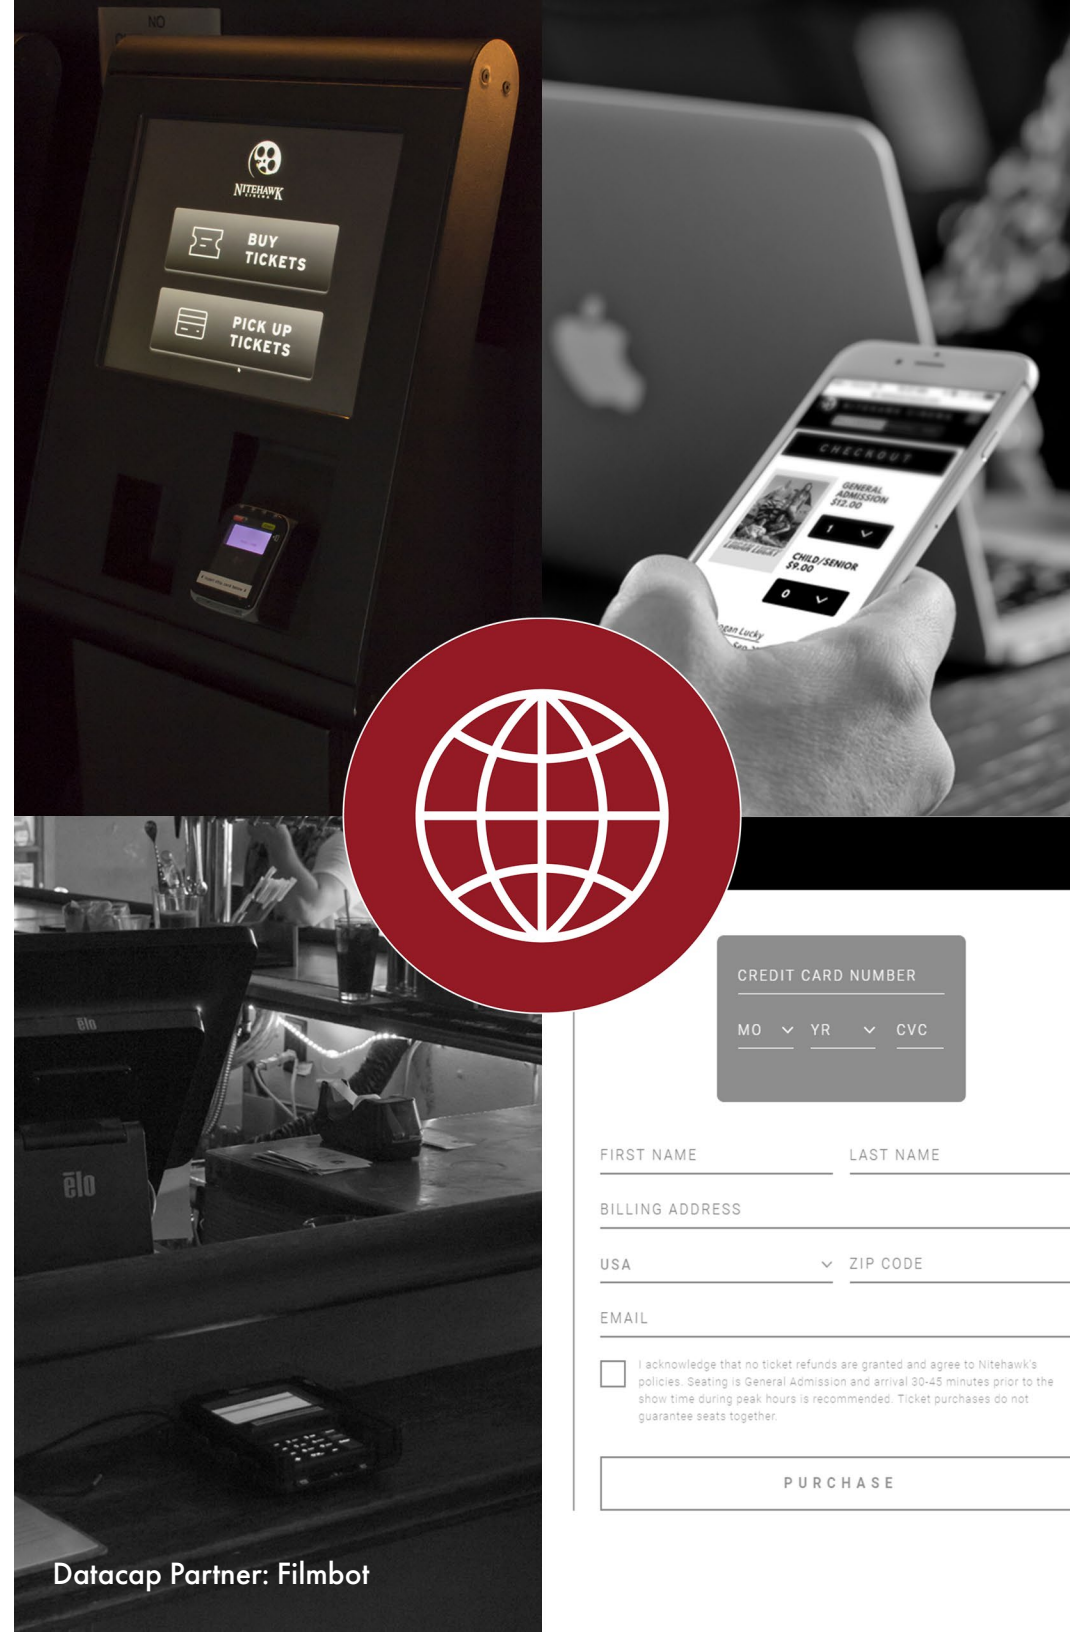

With support for PCI-Validated P2PE, cross-platform tokens, and EMV, Datacap's unattended payments solution places an emphasis on cardholder security.

OMNICHANNEL PAYMENTS

Datacap products combine brick and mortar, ecommerce, mobile and self-service payments to create a seamless “omnichannel” customer experience. Give your merchants the ability to integrate their kiosks/unattended applications, in-store and web payments through a single, comprehensive payments solution.
