

Augusta/Augusta S

Secure EMV Chip Card and Magnetic Stripe Reader

Familiar Form Factor and Functionality

The Augusta is a secure EMV chip and magnetic stripe reader that offers retailers a simple upgrade path to EMV from traditional desktop magnetic stripe readers. This reader is able to provide superior reading performance while also encrypting sensitive magnetic stripe and EMV data. With all data encrypted, the Augusta can participate in end-to-end solutions reducing the risk of data compromises.

Easy to Integrate and Use

The Augusta is very user friendly and reliable. It is available in USB-HID or USB-KB configuration and uses common HID drivers. Beeper, LEDs and bidirectional communication make interacting with the unit very intuitive. The location of the mounting holes makes it easy to mount to any previous MiniMag II or SecuRED mounting bracket. The Augusta is designed with a metal wear plate to be able to support 1,000,000 magnetic stripe operations and a robust chip card connector to surpass 500,000 EMV transactions.

Features and Benefits:

- Available in USB-HID & USB-KB
- EMV Level 1 and Level 2 certified
- EMV Level 2 kernel resides in the hardware
- Bidirectional MagStripe reading
- Provides encrypted MSR or EMV data
- USB Powered
- Reads encoded data that meets ANSI, ISO, and AAMVA standards
- Reads up to three tracks of information
- Support TDES and AES encryption
- DUKPT key management
- Mounting compatibility with MiniMag II and SecuRED
- PCI 4.1 SRED (Augusta S)
- Remote key injection supported
