Integrated Protection, Processing and Payment for Hospitality Environments.

MTech Mobility's Infinity Series offers protection, processing and payment for enabling customer engagement and service right at the dining table – all while keeping the back of the house efficient.

Purpose-Built for Hospitality

MTech's Infinity Series brings together device protection, data and application processing, payments and wireless charging into a single, affordable, all-in-one solution – giving hospitality workers anytime and anywhere access to the resources they need.

Procurement: As a premier Samsung partner, we can equip your locations with the tablets and mobile devices they need.

Protection: Durability is at the forefront of our solution to ensure that drops, spills and the unexpected doesn't slow you down.

Processing: Whether it is taking an order, submitting that order to the back of the house or enabling your customers to view their bill, Infinity Series by MTech provides all the workflow support you need.

Payments: Real-time payment processing right from the solution – quick and easy.

Deployment: Initial preparation, configuration and kitting to drive an unmatched, out-of-the-box experience.

User Support: Around-the-clock support for hardware, software, application, connectivity and other issues that arise.

Device Depot: Spare pool management, overnight replacement, inoperable device return and triage, in-warranty processing and recycling.

Device Repair: Protection plans that extend manufacturer defects coverage and address accidental damage from Day One.

Security: Whether you trust Samsung Knox or another EMM solution, MTech can provide implementation and ongoing administration support.

Material	TPU + PC
Weight	100g
Dimensions	237.4x139.3x30.9mm
Durability	
1	Shock dampinging corners
2	Hybrid material provides cushioning and rigidity where it is needed most
Surface	
3	Non-Slip Coating
4	Easy to sanitize
Ease of use	
5	Fastener Free Design
